Round Serving / Salad Bowl 97382

Butter/Relish Tray 93642

Gravy w/Tray(2pc) 93641

Salt/Pepper 936710

### Care & Handling

*Durability: Did you know that quality porcelain and bone china are actually the strongest ceramic dinnerware materials? It's true. They are fired at the highest temperatures and are made of the strongest ingredients. So you can use your finest china as often as you wish with as much confidence, or more, as your "everyday" set of dishes.*

*Dishwasher: Noritake recently conducted extensive tests on several of its porcelain and bone china patterns and found that they are every bit as dishwasher safe as our everyday dinnerware. So feel free to use your "good china" whenever you want to make an occasion special, or any time at all.*

*But keep this in mind about all of your dinnerware, glassware and tableware: treat them with the respect that high quality, beautifully crafted products of any kind deserve. Although very strong, porcelain and bone china are still breakable if abused.*

*\* Don't overload your dishwasher with anything. Not only will you risk chipping or breakage, but your dinnerware won't get clean either because the water and detergent won't reach everything!*
